- 1 Water Supply** - This budget commits significant funding towards the objective of improving the city's water supply. Included is funding for the purchase of Ontario Drain Tunnel water, \$200,000 for purchase of water stock, and \$4.2 million for a new treatment plant at the Point of the Mountain. These projects will increase our supply as well as our ability to treat and transport water to our system.
- 2 Staffing Changes** - \$5,000 was transferred from Sego Lily Garden Maintenance to Temporary/Seasonal Pay to cover the cost of two interns. Also, the Distribution Technician's title was changed to Water Construction Maintenance Worker and one of them was converted to a Meter Reader.
- 3 City Water Use & Administrative Charges** -The general fund has not paid the full cost of water. The Public Utilities Department also has not paid the full cost of administrative services provided by the general fund. To reduce this cross subsidization, the general fund will pay an additional \$80,000 for water and the water fund will pay an additional \$80,000 in administrative charges.
- 4 Fee Increases** - The master plan recommends an annual fee increase of 6.5% for ten years in order to meet expected growth and the policy objectives outlined above. Consistent with this recommendation, the base fees and overage charges for all customers increase accordingly. These increases will generate about \$1.05 million in additional funding for capital outlays.
- 5 Telephone** -The new SCADA System operates on radio frequencies instead of telephone lines.
- 6 Connections Fees** - We anticipate 400 new connections this year compared to 205 last year.
- 7 Equipment Replacement** - Includes two GIS computers and purchasing a plasma-type pipe cutter.
- 8 Fleet Purchases** - Two vehicles will be replaced and there will be no contribution to fleet contingency.
- 9 Interest Income** - Interest rates have increased from 1.52% to 2.41% and continue to increase.
- 10 Cell Tower Leases** - An annual increase is built into the contracts.
- 11 Funding for Capital Projects** - The excess funding in the Water Operations budget becomes the funding source that covers the deficit in the Water Expansion & Replacement budget. The \$7,615,855 of excess revenue in FY 2006 is available for the capital budget of which \$6,549,123 will be used for projects. If current trends for increases in fees and costs continue, the money generated for capital outlays will be about \$7.3 million in FY 2007, \$8.0 million in FY 2008 and \$8.9 million in FY 2009. These amounts are slightly less than the amounts needed in the three year capital plan. The difference will be made up by cost savings, grant funding, or delaying some projects.
- 12 Debt** - The Water Fund refinanced its debt in 2004 which resulted in savings from a lower interest rate and provided additional money for the capital projects identified in the master plan such as the Granite tank and the zone 5 pipeline from the Point of the Mountain Aqueduct. The total issue was for \$9,965,000 with annual payments of approximately \$1.1 million through FY 2010 reducing to \$560,000 and continuing through FY 2025. The FY 2006 budget includes a principal payment of \$735,000 and interest and agent fee payments of \$379,838.
- 13 Connection Fees** - These are impact fees which are charged to new development and are regulated by state law which specifies that the proceeds be used for capital facilities made necessary by the new development. As required by law, a study was completed in May 2005 which recommended the changes included herein.

**Significant Budget Issues**

- 1 Risk Management Decrease** - Due to safe and proactive operations, we have seen fewer and less costly incidents of flood damage, as a result our risk management premiums have dropped by more than \$20,000.
- 2 Fleet Maintenance** - Increased more than \$12,000 largely due to higher fuel costs
- 3 IS Charges** - IS charges increased due to three new network connection and three new GIS connections.
- 4 Ditch Maintenance** - This line item increased due to the higher costs of maintaining Bell Canyon, Sandy Irrigation, and Sandy Canal ditches.
- 5 Fleet Contingency** - There is no contribution this year because the current balance is sufficient.
- 6 Bicycle Safe Grates** - An increased effort is being made this year to convert inlet grates.
- 7 Gravel Pit Detention Basin** - In order to accommodate new development a drainage pond needs to be built.
- 8 Raise Manholes** - An extra effort will be made to find and raise manholes that have been overlaid with asphalt.
- 9 Neighborhood Projects** - The limit was raised on projects that can be done in-house without getting bids.
- 10 GIS Equipment** - A map-grade GPS unit will be purchased for mapping of valves, meters, etc.
- 11 Flood Basin Fee** - This impact fee is charged to new development and used for capital facilities As required by law, a study was completed in May 2005 which recommended the change included herein.
